Skills

C++ | C | JAVA | Data Structures | Algorithms | OOP

Android Development | Databases | RDBMS | MYSQL | OpenGL

Projects

Railway Reservation System

- Developed a robust railway reservation system employing Linked Lists data structures and OOP to efficiently manage train schedules, passenger bookings, and seat availability

Instagram Clone Android Application

- Successfully developed a Java-based Instagram clone project, delivering a visually appealing and feature-rich social media platform.
- Prioritized user-friendly design and intuitive navigation to enhance user engagement and satisfaction.

Rutherford's Alpha Ray Scattering Simulation

- Successfully simulated and visualized Rutherford's Alpha Ray Scattering experiment using OpenGL, providing a dynamic educational tool for understanding atomic structure.
- Led the development efforts, designing and implementing the 3D rendering and interactive features of the simulation.

Airport Management System

- Developed an efficient Airport Management System with MySQL database integration for streamlined airport operations

Education

Bangalore Institute Of Technology, Bangalore / B. Tech Computer Science and Engineering

2020- 2024, Bangalore

CGPA: 8.50

Achievements

Grand Master @CodingNinjas
Typing Speed : Average – 80 wpm
